Recruitment of student research assistants

Dr. Jiying Jiang's research team is recruiting dedicated and collegial students to assist with research projects analyzing lawmaking (and policymaking) in mainland China, Macau, and Hong Kong, with a comparative perspective. These projects use computational methods with large collections of texts on legislative and policy processes, aiming to understand how public policy is formulated and how policy influence is distributed.

Eligibility

The ideal candidate possesses the following qualities:

1) Familiarity with R or Python.
2) Basic understanding of automated text analysis.
3) A strong interest in research demonstrated by coursework achievements or prior experience.

Priority will be given to applicants who are 1) students enrolled at the University of Macau and 2) have solid training in machine learning and programming skills.

Payment for student research assistants adheres to the University of Macau Guidelines for Student Trainee Scheme.
